

# PROTECT OUR CHILDREN

## WHAT IS RADON?

Radon is a colorless, odorless, radioactive gas that can easily seep into our homes. We all know the risks of exposing our children to second-hand smoke, but did you know the risks of radon exposure can be even more harmful for children?

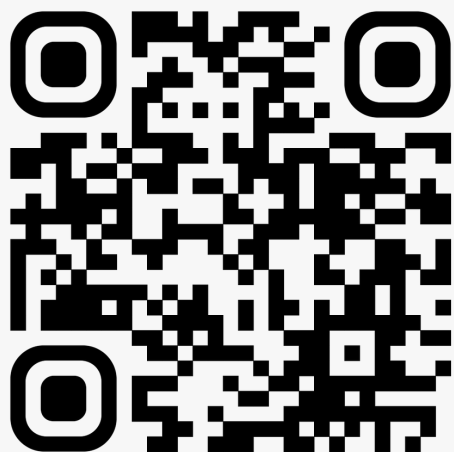

## RADON EXPOSURE

Nearly 1 out of every 15 homes in the United States is estimated to have elevated radon levels

(Radon Gas: What Is It, Detection & Complications, 2021)

## TEST YOUR HOME

"Having your home tested is the only effective way to determine whether you and your family are at risk of high radon exposure" (CDC, 2022).

## TAKE ACTION

ORDER YOUR RADON TEST KIT TODAY
